## **DETAILED ACTION**

### ***Response to Amendment***

1. The Applicant's Amendments and Accompanying Remarks, filed April 15, 2009, have been entered and have been carefully considered. Claims 1 and 4 - 7 are pending. The invention as currently claimed is not found to be patentable for reasons herein below.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Claim Rejections - 35 USC § 103***

3. Claims 1 and 4 - 7 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Forbes et al. (US 2004/0038612). The details of the rejection can be found in paragraph 3 of the Office Action dated January 16, 2009. The rejection is maintained.

### ***Response to Arguments***

4. Applicant's arguments filed April 15, 2009 have been fully considered but they are not persuasive.
5. Applicant argues that Forbes teaches that the core polymer constitutes not less than 30% by weight of the fiber and in all the Examples of Forbes the sheath and core polymer each were contained 50% by weight of the filaments. As indicated in the previous Office Action, Forbes teaches that the sheath comprises ***about*** 20% by weight

to **about** 70% by weight (see paragraph [0007] of Forbes), therefore, the core would be **about** 30% by weight to about 80% by weight. Due to the use of the term **about** in Forbes, the Examiner submitted that the claimed ranges would either overlap or are close enough that one skilled in the art would have expected them to have the same properties. As shown by Table 3 of the Applicant's Specification, specifically examples 9 and 10, a fiber having a core being 50% by weight and a sheath being 50% by weight would have a lower extensibility at maximum load. Applicant has not shown that a fiber having a core constituting **about 30%** by weight would have a different extensibility at maximum load. It should be noted that it has been held that disclosed examples and preferred embodiments do not constitute a teaching away from a broader disclosure or nonpreferred embodiments. In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971). In this case, it does not constitute a teaching away from a core being **about 30%** by weight. Applicant is reminded that evidence must provide a showing of critical and unexpected results and must be commensurate in scope with the claim. For these reasons, the rejection is maintained.

### **Conclusion**

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1794

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
